

STARLAND COUNTY POLICY MANUAL

FUNCTION: Roads and Streets

FUNCTION NUMBER: 320

POLICY: Dust Control

POLICY NUMBER: 320-15

DATE: March 12, 1996

1. An advertisement requiring applications for dust control will be placed in the Drumheller Mail during the month of April and applications for dust control must be submitted to the Administration Office prior to June 30th of each year. Dust control requests will still be accepted after June 30th, but application cannot be guaranteed unless there is sufficient cold mix material available to provide the service.
2. The Municipality will apply an application of hauled-in cold mix for approximately 1/6 of a mile (880 feet) in front of a ratepayer's residence, for the purpose of dust control, for \$1,900.00 (plus G.S.T.).
3. The annual road program of Council may include locations where the Councillor for a division includes as part of his road program some form of dust control or a road treatment that provides dust control to a ratepayers residence. Whether or not the resident has requested dust control, if the control provided is as a result of the Annual Road Program, the resident will not be charged in accordance with Section 2 of this policy.
4. Starland County reserves the right to grade any stretch of road which may have a dust control product applied to it, at any time during its normal grading operations, if the motor grader operator deems it necessary, and first obtains the authorization to do so from the Public Works Supervisor.
5. Dust Control applications are guaranteed to provide "dust control" for a minimum one year period from the date of application. A brochure explaining the policy, including the right of the County to work the site, will be submitted to each applicant with their invoice for the dust control application.
6. **Note: By Council motion C06-133, the Dust Control Program is expected to be discontinued in 2007 because of the high cost of purchasing oil products.**
