Rumsey Spring Fling Dinner and Silent Auction April 26

Answers: 1. About 1 million 2. 70-73 loaves 3. About 42 lbs

Parmesan Baked Potato Halves Ingredients

- 6 small potatoes, scrubbed and cut in half
- 1/4 cup butter
- Grated parmesan cheese
- Garlic powder
- Other seasonings

Instructions

Preheat oven to 400 degrees. Melt butter and pour into a 9 x 13 inch pan and spread evenly across the bottom. Generously sprinkle parmesan cheese and lightly sprinkle other seasonings all over the butter. Place potato halves face down on the butter and seasonings. Place in preheated oven and back 40-45 minutes. Cool for at least a full 5 minutes before removing from the pan, otherwise parmesan crust wont stick to the potato. Serve on a plate with a side of sour cream.

Shandele's ol' boutique

Shop: 403-364-3300
120 Main Street Delia, AB
Shandele is pleased to welcome
Carly-Jae a full time Master
Stylist, Color Artist and Extension Technician, to her team!
Carly-Jae is a Red Seal Licensed hairstylist and will be offering advanced sculpture cutting (specializes in straight blade),
Color Artistry, Hair Extensions,
Eyelash Extensions, Make-up
Artistry, Full Body Waxing and
Brazilian Waxing.

Carly-Jae comes to us from a salon in the Edmonton region. She and her boyfriend Derek Bramwell have decided to take up permanent residence in the Delia area.

For additional information or to connect with Carly, please call her @ (403)820-4814 or the shop (403)364-3300 or email @ Carly_marouelli@hotmail.com

NOTICE TO FARMERS

2% Liquid Strychnine Control Program

The sale of 2% Liquid Strychnine Concentrate (LSC) for the control of Richardson's Ground Squirrels (RGS's) has been approved for the 2014 season.

Starland County is participating in this program and will have 2% LSC available to qualifying farmers from April 2nd until June 30th. The abbreviated details of the program are as follows:

- The product is only available to Agricultural Producers in Starland County
- Each producer is restricted to 2 cases (48 bottles) of Strychnine per purchase and the minimum purchase is 6 bottles
- The purchaser must sign a document that states:
- A) they have a severe infestation as defined by AB Agriculture and Food,
- B) they will use 2% LSC only for control of the RGS's.
- C) they will not sell or give away any 2% LSC,
- Provincial Pest Inspectors may inspect your property to ensure that you are complying with all the label directions and conditions of use and registration
- Any non-target poisonings must be reported and the product cannot be used on any quarter which has burrowing owls or any other species at risk
- Violation of any of the outlined terms and conditions will result in the purchaser forfeiting the right to any further purchases of strychnine and could result in a fine of no less than \$1500.00

Cost of the product is \$180.00 per case or \$7.50 per bottle

For further information or to book your product please contact Alan Hampton or Dara Calon at 772-3793

Don't Forget to Test Your Seed

Fusarium graminearum infected grain has been positively identified at trace levels in Starland County. F. graminearum is a seed-borne pathogen, and infected seed or feed, along with infested crop residues such as straw represent the greatest risks of introducing or spreading this pest. Fusarium graminearum is the causal agent of Fusarium Head Blight (FHB). Once established, FHB is a costly disease to deal with and left untreated can impact yield, grain quality, feed efficiency, malt barley production and negatively impacts seed potential.

Starland County has a policy of zero tolerance on *fusarium graminearum* infected seed grain for use in our County. Due to the known occurrence of this pest in our County and the increasing presence of *F. graminearum* in Alberta, we advise that you test your seed for the presence of *F. graminearum* prior to planting and do not use this seed if *F.graminearum* is present.

Seed testing eliminates the unknown and is the first line of defense in reducing the potential spread of this disease. Seed testing along with a seed treatment, crop rotation and complementary agronomic practices will go a long way to reduce or prevent the establishment of not only *F. graminearum*, but a host of other potential crop diseases and pests.

The standard *fusarium graminearum* screen costs \$37.00 and a germination and fusarium test cost \$48.00. Seed is the ultimate crop input, and testing tells you everything you need to know to make an informed decision not only this season, but possibly in years to come. For more information contact Al Hampton or Dara Calon at the County office at 403-772-3793.

Primrose Dairy Tour

Primrose Dairy and it's new water treatment system "Bio-Water" was toured on January 24th. This new system was implemented with cattle health and increased production in mind. Water quality is often overlooked, and with this system the cattle are showing increases in milk production. Water is filtered by natural microbial processes through a series of tanks. Cornell and Cremona Primrose were gracious hosts and allowed a group of people to tour their barn and observe their new water treatment system on January 24th The Primrose Dairy will also be toured on the Annual Starland County Summer Tour.

Preparedness Tips for Rural Residents

Homeowners are often reminded to have a plan for emergencies, from food and water storage to an escape route in case of a fire. But rural residents and farmers can't simply leave with only their loved ones and important documents, as many have livestock and many other important things they have to protect. Brad Andres, emergency program manager for Alberta Agriculture and Rural Development, said that preplanning for emergencies is essential to farm and rural life. "Part of what we found looking at the natural disasters – floods, fires, disease outbreaks and pest outbreaks – is that a lot of damage can be prevented by farmers and farms taking some of the early steps to prepare themselves," said Andres.

By thinking ahead and creating plans for a specific operation, farmers and landowners can hopefully prevent – or at least minimize – losses to their livelihood. There always needs to be an escape plan for family members, and important documents should be stored in an easy-to-access location in case of a fire, but he said livestock farmers should also have a plan to get their animals to safety. And every landowner should have a plan based on the layout of their particular property, he added. "There's no way to move 1,000 cows quickly. If you've got a grass fire coming at you, you need to have a plan in your head already on what you're going to do to protect your operation, your house and your buildings, because it's not going away," he said.

The first step is to know what risks a particular operation has. "And that really does depend on where your farm is, what the land is like. It really comes down to what are the risks around you. My parents' farm has a natural gas pipeline that runs right alongside it. So for them they should think about whether the gas company knows their number," he said. In that case, there should be a plan to evacuate in case there's a leak or explosion related to the pipeline.

Weather, fires, and even train tracks are all variables to consider when forming a plan, he added. The Alberta Emergency Alert (AEA) website (www.emergencyalert.alberta.ca) has local authorities that post up warnings for their respective areas, and people can sign up to receive text message or email alerts as well. If you have a plan, he suggested writing out the plan and discussing it with family members and even farmhands so that everybody knows what to do.

These warnings are not alarmism, it's simply about being prepared for all situations, rather than being caught off guard should the worst come to pass. "We're

Even if animals aren't in danger, he asked whether farmers are prepared in the case they are ordered to evacuate and their animals are left untended for a week or more. He urged people to simply play out all the various possibilities that could affect them to ensure that they will be as prepared as possible for any sort of disaster.

"And be realistic about what could happen. Is a tornado going to touch down in Peace Country? Possibly. But statistically, that's one of the low-risk areas. If I was living there I might not worry about it that much," he said. "If I lived up on the ridge above the North Saskatchewan River, would I be worried about flooding? Holy cow, if the river is leaving the valley, we've got bigger problems to worry about. Be practical about the risks that affect you, and be honest about the things that you can do something about."

Day-to-day emergencies should also be considered, so even something as simple as a few fire extinguishers scattered throughout shops and other buildings is a good idea. "All kinds of little accidents happen. Is my fuel and chemical storage properly done? If you haul your own animals, are you prepared for an accident, and do you know what you're going to do if you have one?" he said.

Train track location and dangerous goods routes, as well as possible diseases that can affect livestock and crops are also possible situations to consider. "And then the big natural disasters: floods, fires. I don't know if I would call the heavy snow lately a natural disaster, but on the day-to-day emergency side it's something to consider," he said.

"It comes down to the operation and what kind of land you have nearby. That's why having a general plan that everybody uses doesn't make much sense. Each operation is so unique in its numbers, its layout and its alternates for sites, that it's something every farmer has to do for themselves." In most cases, he said there's a couple of choices in evacuating animals, from transporting them, hunkering them down and hoping it works out, or just opening the gates and letting them loose.

For some animals, a barn may be the safety zone for animals if they aren't free range animals, he added. "So your plan has to make sense for the risks and your own operation," he said. It is also important to know where to get warnings from and how to ensure that the warnings get to you in a timely manner.

More information on creating a Rural Emergency Plan can be picked up at the

YOUNG FARM WORKER SAFETY TRAINING

Tues, April 29-OLDS COLLEGE

Attend the workshop, complete the workbook and farm hazard assessment and receive 1 high school credit!

Safety Training Available in:

Power Line Safety
Confined Spaces
Distracted Driving
Equine & Cattle Safety
Large Machinery & Fire Exinguisher

Registration Fee: \$40

Green Certificate Students: Free Green Certificate Trainers and Parents of Young Farm Workers welcome.

Red Cross Emergency First Aid Training Full Day Session: \$45 additional fee

free lunch*free swag*awesome prizes

GROWING FORWARD 2 UPDATES

There is still funding for many projects under Growing Forward 2

On Farm Stewardship

- Grazing Management
- Manure Management
- Improved Pesticide Management
- Fuel and Used Oil Management
- Riparian Areas Fencing and Management
- Year Round/Summer Watering Systems
- Portable Shelters and Windbreaks
- Wetland Restoration
- Improved Manure Storage Facilities
- Livestock Facility Runoff Control
- Livestock Facility and Permanent Watering Site Relocation

Other Programs are:

- Agri Processing Automation Efficiency– Livestock
- Agri Processing Product and Market Development

 Crop
- Agri Processing Product and Market Development

 Livestock
- Business Management Skills Development
- Business Opportunity
- Confined Feeding Operation Stewardship
- Food Safety Systems Delivery Agent
- Irrigation Efficiency
- Livestock Welfare Delivery Agent
- Livestock Welfare Processor
- On Farm Enery Management
- Regional Water Supply
- Traceability Pilot
- Traceability Technology Adoption
- Traceability Training

Environmental Farm Plan material can be picked up at the County Office. Growing Forward 2 application forms are also available. If you are interested in more information on Growing Forward 2 or the Environmental Farm Plan call Dara at 403-772-3793.

Enter for a chance to curl with Gold Medal Olympian Kevin Martin

We hope to see you in Rumsey for a night of great entertainment with our friends & neighbors!

ckets:

40.00 for supper & dance

or more info or tickets contact: ent Holowath (403) 368-3733 eanne Griffith (403) 820-4815
